

Universal Notebook Charger 120W

Automatic notebook charger 120W with LED display

EM3966UK

EAN: 8716065257656

OVERVIEW

- Multi functional charger with automatic voltage selection
- Suitable to charge notebooks, LED monitors and other equipment
- Comes with 8 cornered tips.
- With LCD screen to display output voltage
- With temperature protection (85C degrees), over voltage protection (24V), over current protection (6.5A), short circuit protection
- Stops charging when the battery is full
- Easy installation
- 2-Year warranty
- Accessible helpdesk
- Multilingual user manual
- Euro plug: EM3966 / UK plug: EM3966UK

SPECIFICATIONS

- AC input: 100-240V, 1.8A, 50-60Hz
- Output: DC 12V - 24V 5A (max)
- Cable length: ~ 1.40m
- Size: 16.7x6.5x4.0cm
- Charger weight: 702g
- Power cable: IEC 320 C6

Universal Notebook Charger 120W

Automatic notebook charger 120W with LED display

DESCRIPTION

Lost the power supply of your notebook, or want an extra adapter? This universal notebook adapter replaces the power supply that came with your notebook. The EM3966 Universal Notebook Charger was created by our engineers to meet the needs of owners of high performance notebooks and other devices up to 120 watts. Choose the power plug that fits your notebook, and the EM3966 will automatically change its output voltage.

Solid quality plugs

Tired of those universal adapters with power plugs that break easily, and don't fit your notebook as well as promised? The EM3966 has solid high quality tips. They fit firmly into power socket of your notebook. The adapter is shipped with tips for several brands, including Asus, Sony, HP, Lenovo, Delta, IBM, LG, MSI, LS, Compaq, NEC, Panasonic, Fujitsu, Sony, BenQ and Acer. This universal power supply adjusts its output voltage using an intelligent technique that detects which power plug is connected. To find the plug that fits your notebook, do not only check if the plug physically fits the power socket of your device, but also check if the voltage that is indicated on the display of the adapter is correct for your notebook. The product box gives an overview of the voltage of each power plug.

Safety and Luxury

The LCD display of the EM3966 has a red back-light, that gives a sense of luxury. No concessions were made to safety. The adapter has a fourfold intelligent protection system, that protects against overheating, over voltage, over current and short circuits. Also, the adapter stops charging when it notices that your battery is full.

How to calculate the wattage of your notebook

To see if the universal charger is suitable for your netbook or notebook, you can calculate the wattage of your laptop. First, check your current charger or check the properties of your notebook. Then multiply the volts by the amperage to calculate the total watts needed. For example, if your current charger has an output of 15V 3A, you need an adapter with 45 watts (15V x 3A) at minimum
