UTP Cable 50m

Use this long distance UTP cable to connect your security cameras!

DESCRIPTION

With the Eminent EM6062 UTP cable, you can easily install your security camera at a long distance from your digital video recorder. The EM6062 UTP cable is perfectly suitable for use with the EM6053 Video Balun. Connect the EM6062 UTP cable and the EM6053 Video Balun to your Eminent digital video recorder or any other security recorder with BNC connectors.

Long distance UTP cable for security cameras

The Eminent EM6062 long distance UTP cable enables you to connect your security camera to your digital video recorder (DVR). The cable length is 50 meter. Equip yourself with the Eminent EM6053 Video Balun as well to create a long distance connection to your Eminent DVR. This cable is suitable for every security recorder with BNC connectors.

The EM6062 UTP cable can easily be installed everywhere, thanks to the flexible wires and the thin diameter of the cable. Since this UTP cable has 4 wires, you can transfer both video and power over one single cable.

Installation of a security camera on long distance has never been so easy!
